Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over the EP reference '440 in view of the U.S. patent to Taghezout. The primary reference discloses a watch movement including hand display 30,32,33 of the current time, pivoting about a first axis corresponding to the center of the movement, four mobile elements with hands 26, 40, 50, 60 pivoting on respective axes. The mobile elements are disposed around the dial of the watch. Taghezout teaches the arrangement of time indicators 18-21 in a timepiece in a straight line. One of ordinary skill in the art having both references would thus be taught that the mobile time indicators in the EP reference may be placed in this manner for enabling sequential determination of the time components.

2. With respect to claims 5 and 9-11, Taghezout suggests at col. 1, lines 8ff that the mobile indicators current time, date day, measured time etc. One skilled in the art would thus select any combination of these for display which would be useful for the specific purpose of the watch. Regarding claims 7 and 12-16, arrangement of the watch elements on a plate would be conventional in view of the structure of watch movements generally comprising plate components for securing the watch elements. A module 2 is shown in Taghezout for securing the mobile elements.
